DCHI Strategic Planning

Discussion during Oct Board

- Discussed **context and current urgency** around revisiting the DCHI strategic plan
- Shared **high-level findings** from strategic planning process
- Shared “what we heard” related to **specific DCHI initiatives**

Objectives for today

- Share **12 strategic imperatives** arising out of strategic planning process
- Discuss additional **Board input** related to strategic imperatives
- Align on **high-level timeline for implementation**

Recall: findings from DCHI strategic planning process

DCHI has created an important **forum for multi-stakeholder discussion** and more in-depth analysis of issues than commonly found in public/private venues

DCHI's portfolio largely **addresses the highest priority issues**, although our approach in some cases **needs to evolve** with changes in the market landscape

DCHI needs to **more systematically communicate** about its work and its connections with stakeholders' strategic, operational, and individual decisions

In most cases, DCHI will **need the skills and capacity to shepherd initiatives through implementation/launch** but should look to other organizations for ongoing operations

DCHI should more **proactively identify where policy solutions are necessary to support innovation** and work with policymakers to ensure those solutions are sensible

Twelve strategic priorities emerged in the process (1/3)

- 1 Maintain a broad portfolio of initiatives as necessary to realize the goals on which DCHI was founded, but evolve that portfolio in response to changes in the landscape
- 2 Establish and sustain a strong implementation role for most initiatives that extends well through launch, but generally look to other organizations for ongoing operations
- 3 Identify where policy solutions are necessary to support innovation and work with policymakers as necessary to bring those solutions to fruition
- 4 Ensure that adoption of value-based payment for primary care supports our goals for transformation, while fostering other models to transform the full continuum of care

Twelve strategic priorities emerged in the process (2/3)

- 5 Work with the next administration to leverage the State of Delaware's purchasing authority to foster provider risk sharing as a critical enabler of quality & affordability

- 6 Align DCHI-led delivery system transformation efforts with regulatory changes and investments being made by payers and providers to achieve similar goals

- 7 Evolve our approach toward multi-payer alignment of quality measurement and reporting, to ensure impact and long-term sustainability

- 8 Accelerate the rollout of Healthy Neighborhoods by streamlining the proposed operating model and establishing priorities based on identified community needs

Twelve strategic priorities emerged in the process (3/3)

- 9 Adopt a systematic approach to communicating with stakeholders regarding DCHI's efforts and how they dovetail with the efforts of other organizations and individuals

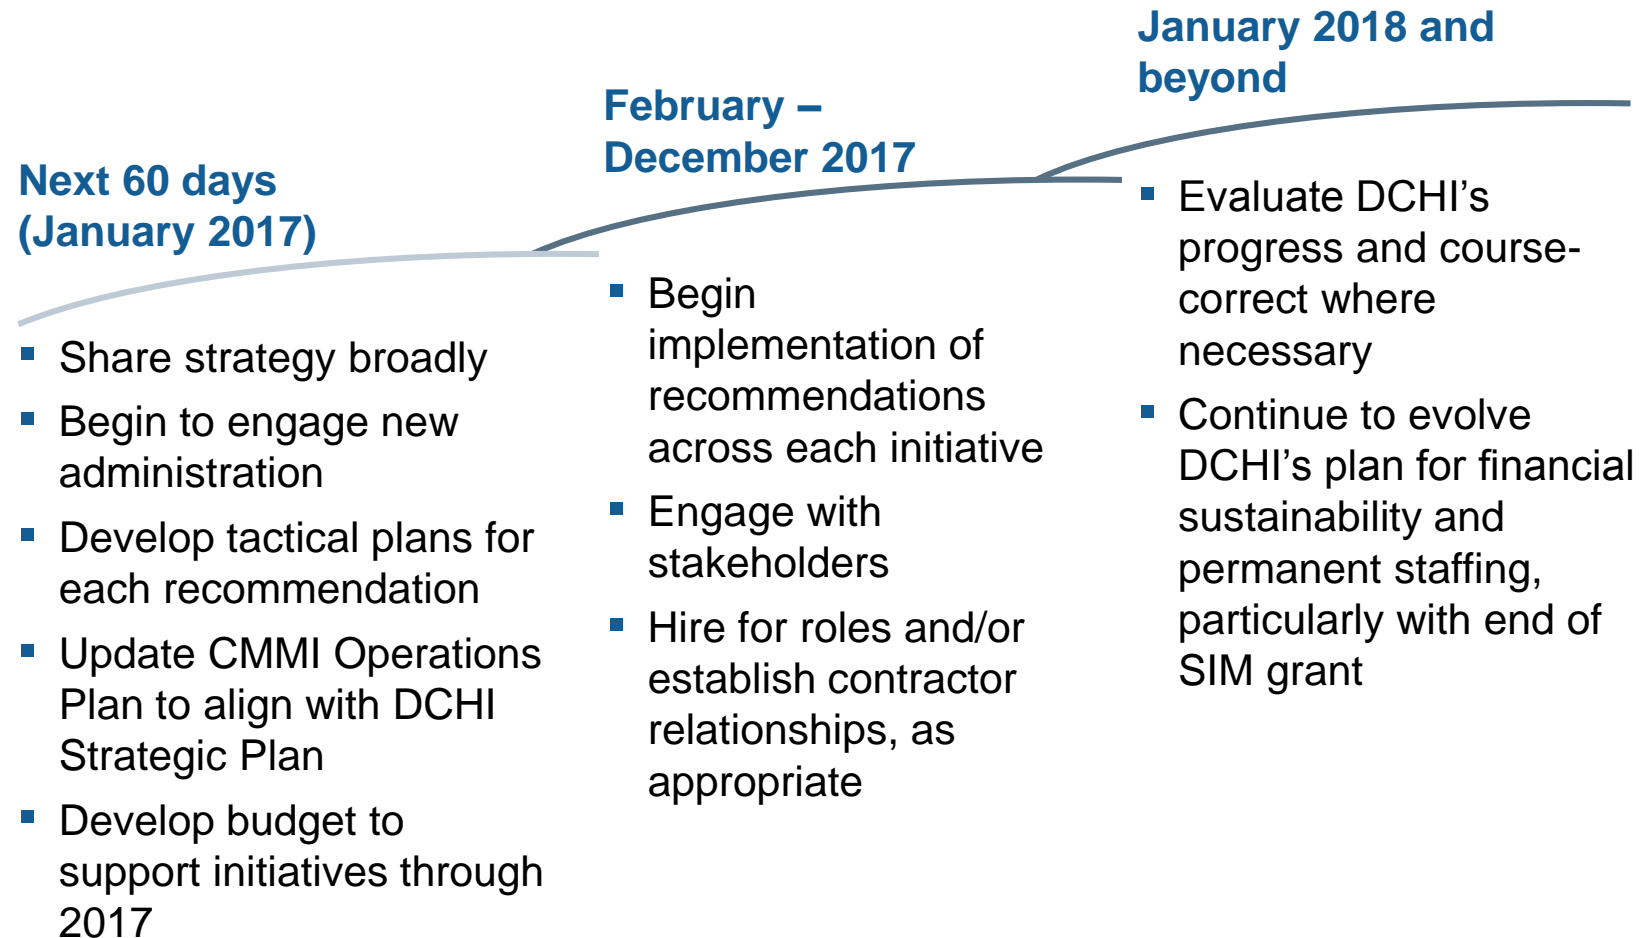

- 10 Affirm our commitment to be transparent in our decisions and use of resources while creating channels to manage sensitive information and challenging discussions

- 11 Continue to fund DCHI operations through stakeholder contributions, but augment this with grant funding for design and implementation of specific initiatives

- 12 Continue staff hiring plan; rely on contractors for time-limited projects that require surge capacity and/or specialized expertise
