My dad lives with me.

I'LL GET A FLU VACCINE.

Even if you're healthy, if you live with or care for people at high risk for severe complications from influenza, you should **get vaccinated**. Groups at high risk include **infants**, **pregnant women**, kids and adults with chronic medical conditions like **asthma**, **diabetes**, or **heart disease**, and adults aged **65 and older**.

DON'T GET THE FLU. DON'T SPREAD THE FLU.
GET VACCINATED.
