In reference to Request for Proposal No. PSC-805, Document Imaging System, Section 4.13.2, specifically:

“The State prefers to purchase third party hardware and software directly unless there is significant advantage to the State in having the hardware/software as vendor deliverables. In either case, all software licenses must be in the name of DHSS and must provide for separate development, test, training and production environments.”

DSS would like to add, “For the purpose of this RFP, please provide separate pricing for all third party hardware and software that the State, at its discretion, may decide to procure through the winning vendor as part of this contract award.”
