

35th Annual Summer Institute

July 24-28, 2006

Clayton Hall – University Of Delaware – Newark, Delaware
Delaware Health and Social Services – Division of Substance Abuse and Mental Health

Featuring the Exciting New Half Day Workshop

Identifying Individuals with Traumatic Brain Injury (TBI)

Monday, July 24 1:30 PM to 4:30 PM

You will learn:

- How to identify and help challenging clients on your caseload – Hear directly from survivors.
- About common TBI symptoms like poor impulse control, memory loss, and others.
- How to recognize behaviors that are symptomatic of TBI and utilize screening tools.
- Which therapies are effective.
- Identify strategies for changing behavior.
- How to address TBI in your treatment plan.

Did you know...

...over 5.3 million Americans currently live with disabilities resulting from TBI.

...each year in the US an estimated 1.5 million people sustain a TBI, which is 8 times the number of people diagnosed with breast cancer and 34 times the number of new cases of HIV and AIDS

...that causes of TBI are diverse and include: open head injury, deceleration injuries, and closed head trauma.
