

DDDS Advisory Council

Member: Nancy Beil

Nancy is the CEO and owner of Sea Care, LLC. Nancy is a native Washingtonian, who began her career working for the Federal Government while pursuing a degree in Business Administration. In 1997 Nancy and her family moved to Sussex County, Delaware, where she accepted a seasonal casual position at the Stockley Center. While working at Stockley, Nancy's long-time desire to work in the field of healthcare re-emerged and she returned to college and studied public health and nursing, while working for Stockley Center and Kent Sussex Detoxification Center in administrative roles. In 2005 Nancy accepted a Support Coordinator position with a national provider agency. After several years, she was promoted to the position of Delaware Regional Director. As Regional Director, Nancy and her team opened 28 residential homes, started two specialized day programs, added clinical nursing supports, consultative behavioral supports and provided residential and day opportunities for hundreds of deserving individuals in Delaware. In 2014, after the loss of her beloved husband, Nancy resigned from her position as Regional Director and briefly worked for a small provider agency before starting Sea Care, LLC. Nancy's passion has always been supporting individuals that have significant behavioral support needs. Nancy and her team believe that every service recipient deserves a forever home and no matter how big of a challenge it may be, the end result is worth its weight in gold! Nancy lives in Georgetown, with her new husband, Don. She has two grown sons, Michael Beil and Matthew Beil, and two amazing grandsons, William and Wyatt.
