## Senate Concurrent Resolution 13

- Not an executive order
- Has funding!
- Politically savvy,
- Part of No Child Left Inside
- Requires DeIDOT to demonstrate its efforts periodically to the bond bill committee

### State puts bucks into plans to link towns with trails

By Cape Gazette staff

*Cape Gazette of Lewes, Delaware*

\$7.5 million targeted for projects inside, out of parks

 Email  Print  Share  Tweet  Copy

The concept of connecting Delaware communities with walking and bicycling trails is taking a big step forward this week. The General Assembly's Bond Bill Committee voted unanimously last week to include \$7.5 million in the bill to move several trail projects forward inside and outside Delaware's state parks. At least half of that money is expected to be spent in Sussex County.

## About IPA

### A Message from the Director

I am pleased to welcome you to the website of the Institute for Public Administration (IPA). This site provides important information about our many **programs** and projects, our **staff** and **students**, as well as access to recent **publications**. Our site also links you to related units at the University of Delaware and partner organizations with which IPA collaborates at state and national levels. In 2011, IPA joined the **College of Arts & Sciences** at the University of Delaware and officially became part of the college's **School of Public Policy & Administration**.

Established in 1973, IPA addresses the **policy, planning, and management needs of its partners through the integration of applied research, professional development, and the education of tomorrow's leaders.**

We provide direct staff assistance, research, policy analysis, **training**, and **forums** while contributing to the scholarly body of knowledge in public administration.

If you're a **prospective student**, take a look at **what our students say about the Institute for Public Administration**. If you're a Delaware citizen, we urge you to browse our site to get a glimpse of the broad range of **services IPA provides** within Delaware and beyond. I hope you'll look to [www.ipa.udel.edu](http://www.ipa.udel.edu) as your primary online public administration resource. Using social media is an additional way we're getting our word out to the world. Friend us on **Facebook** and follow us on **Twitter**.

Your comments are appreciated. I will be happy to answer any questions you may have about IPA. I can be reached at 302-831-8971 or by **e-mail**. Thanks for visiting. I hope you'll return often.

**Jerome R. Lewis**  
Director

## Impacting the Public

### Health Policy

The Institute for Public Administration provides a range of **health policy** and research services to many of Delaware's governmental and healthcare organizations. These services cover issues such as healthy communities/active living, the uninsured, public finance of senior centers, and consumer assessment of health providers and systems.

Courses in health policy and the economics of health care, through the **School of Public Policy & Administration**, are taught at both the graduate and undergraduate level (e.g., Health Policy, Health Economics, Economics in Public and Nonprofit Sectors, and Economics of Health Policy).

IPA faculty, staff, and students focus on the three key facets of health care—**access, cost, and quality**. Students experience real-world project work, which includes working directly with clients, writing literature reviews, conducting statistical and program analysis, writing technical reports and research reports, and preparing presentations for conferences and high-level government officials.

For more information, contact [Eric Jacobson](#) (302-831-1711).

## Local Government Training

### Delaware Institute for Local Government Leaders

#### The 22nd Institute

Friday, October 22, 2010  
8:30 a.m. to 1:30 p.m.  
UD Carvel Research & Education Center  
Georgetown, Delaware

2010 program (PDF - 1.7MB) 

The 2010 Delaware Institute for Local Government Leaders was the 22nd program in a series that addresses contemporary issues facing local governments. Its session topics included:

- > **Economic Benefits of Walkability and IPA's Healthy Communities Initiative** (2.7MB PDF) 
- > **Implementing Complete Streets Policy at the Local Government Level** (2.7MB PDF) 
- > **Showcasing Delaware's Healthy Communities: Breakthrough Strategies Used in Delaware Municipalities**
  - > **Development of City of Newark Trails** (6.0MB PDF) 
  - > **Villages of Five Points near the City of Lewes** (3.2MB PDF) 
  - > **City of Dover Community Design** (2.7MB PDF) 
  - > **City of Milford's Misspillion Riverwalk** (8.4MB PDF) 
- > **Transportation Project Planning: Technical Assistance Available to Delaware Municipalities** (4.7MB PDF) 
- > **Broadband Planning - Update on Delaware's Initiatives** (2.3MB PDF) 

The available presentations on the topics above are downloadable in PDF from the links in the list.

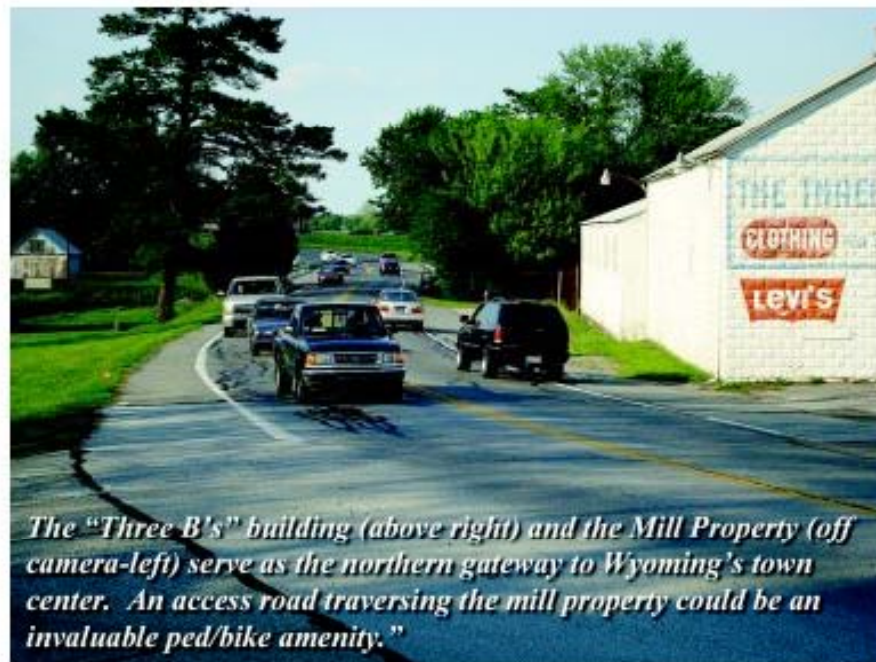

# Town of Wyoming Comprehensive Plan

[www.ipa.udel.edu/localgovt/municipalities/wyoming/wyoming\\_updatePLUSdraft.pdf](http://www.ipa.udel.edu/localgovt/municipalities/wyoming/wyoming_updatePLUSdraft.pdf)

*2011 Update to the 2004 Town of Wyoming Comprehensive Plan – Draft for Adoption*

28

Another key area of concern identified was the stretch of Railroad Avenue going over the bridge past the Mill and the Three-B's property, northeast to the church and a number of homes. Though market forces will likely determine how this area develops, the town is hopeful that existing service roads/paths may one day be available to pedestrians and cyclists to ease the "bottleneck" effect that currently exists here. The area is exceptionally scenic and already a popular spot to enjoy outdoor activities, and it is hoped that it will one day serve as a gateway to the town-center area.

*The "Three B's" building (above right) and the Mill Property (off camera-left) serve as the northern gateway to Wyoming's town center. An access road traversing the mill property could be an invaluable ped/bike amenity."*

The town would also like to explore some way of ensuring safe, accessible railroad crossings for pedestrians. Work continues on the pedestrian network each year. In 2010 a DelDOT grant saw sidewalks installed on the west side of Railroad Avenue from Third Street to Southern Boulevard and on the east side of North Layton Avenue from Front Street to the entrance to Wingate.

## Forum on Local Access to Healthy Foods

Access to Healthy  
Foods in Delaware's  
Built Environment

> podcast and presentations

May 24, 2011 – Embassy Suites – Newark, Delaware

This forum was convened by the Delaware Coalition for Healthy Eating and Active Living (DE HEAL) and the Delaware Chapter of the American Planning Association to identify urban food access issues in Delaware and explore and discuss solutions for a path forward. The forum brought together agencies, organizations, and community leaders to discuss innovative, sustainable policy options, and approaches that can lead to a healthier Delaware.

**Presentations** and keynote speakers identified the extent of "food deserts" in Delaware and discussed their implications on individuals and communities. Other issues addressed included the lack of access to healthy foods due to a lack of retailers, limited transportation options, physical barriers in the built environment, or some combination of these items.

- > Access to Healthy Foods
- > Healthy Communities: A Resource Guide for Delaware Municipalities, published August 2008

For more information, contact Marcia Scott (302-831-0581).

## Introduction

IPA has formed strategic partnerships (see Related Links) with nonprofits, state agencies, and other University of Delaware units to provide comprehensive solutions to improve the built environment and catalyze changes in public policies, land-use plans, and behavior. Coordinated initiatives are designed to leverage strategies to influence active living by promoting smart growth principles, shaping transportation and land-use policies, designing pedestrian-friendly infrastructure, enhancing recreation programming, and

- ▣ Environments
- ▣ Assessment Tools
- ▣ Health-Impact Assessment (HIA)
- ▣ Complete Streets
- ▣ Access to Healthy Foods

This project was funded by the Delaware Division of Public Health.

DELAWARE HEALTH AND SOCIAL SERVICES  
Division of Public Health

This toolkit is based on a resource guide that reflects the most up-to-date information with regard to developing healthy communities in Delaware. This healthy communities toolkit was created with the Delaware local government in mind; however, many of the ideas and concepts herein are appropriate for community leaders and citizens alike who are interested in contributing to a healthy community initiative.

If you are a local government official and the healthy communities concept is new to you and your colleagues, we suggest that you check out the [Introduction](#) and [FAQ](#) pages. If you're ready, you can begin with the [Getting Started](#) section. These pages/sections provide background information on healthy communities and why this initiative is important. It also provides information on [how to assess](#) the health of your community and whom to involve in a healthy communities initiative.

“Community achievements in the areas of policy, systems, and environmental changes have far-reaching implications by serving as models that can be replicated nationwide to improve the health of young people, adults, families, and underserved populations.”

—Centers for Disease Control and Prevention, 2009

Publications on or linked to from these pages are downloadable in PDF and are indicated with  [Download Adobe Reader now](#) if you don't have version 6.0 or higher of this free software. Also see instructions on viewing/downloading PDF files.

# Walkability Assessment Tool

[www.ipa.udel.edu/healthyDEtoolkit/tools/walkability](http://www.ipa.udel.edu/healthyDEtoolkit/tools/walkability)

## Introduction to the Walkability Assessment Tool

> [back to Tools index](#)

### What is the Walkability Assessment Tool?

The Healthy Communities Walkability Assessment Tool is a document that provides Delaware municipalities a way to evaluate the strengths and weaknesses of the town's walkability. Increasing the walkability of a community not only has economic benefits, but walking is also one of the easiest and cheapest ways to stay physically fit. Completion of the assessment can help to identify opportunities to improve the walkability in the specified community.

### Who should use this tool?

The Walkability Assessment Tool is intended for use by local government officials. It is recommended that this process be completed by an authorized representative or group representing the jurisdiction. In larger towns, elected officials or professional staff (such as city planners) may complete the assessment; however smaller municipalities may simply choose a committee member or representative familiar with the community's health issues.

# Comprehensive Plan Assessment Tool

Pedestrian/Bicycle Accessibility	Check	Page #
1 Community or town goal that emphasizes pedestrian and/or bicycle facilities		
2 Community or town goal to enhance children's pedestrian and bicycle safety

# Access to Healthy Foods

[www.ipa.udel.edu/healthyDEtoolkit/foods](http://www.ipa.udel.edu/healthyDEtoolkit/foods)

## Introduction

Having access healthy foods is essential for maintaining a healthy lifestyle. A 2010 **White House Task Force on Child Obesity** report found an association between food insecurity and obesity. The report recommends a comprehensive approach to mobilize public- and private-sector resources to help all Americans make healthier food choices.

To establish a healthy diet, health professionals recommend the consumption of a variety of portion-controlled, natural food, which includes fresh produce, whole grains, low-fat dairy, and high-protein vegetables and meat. Nutritious eating and physical activity can provide individuals with proper nutrition and energy, the maintenance of optimal weight, and a lower risk of disease—including high blood pressure, cancer, and type-2 diabetes. The following are ways that local governments can help promote greater access to healthy foods:

- Addressing and understanding “**food deserts**”
- Supporting local **farmers’ markets**
- Building **community and urban gardens** for school and public use
- Developing programs that support affordable retail options and ultimately **improve affordability** for members of the community
- **Additional resources** about access to healthy foods

> See **rationale for access to healthy foods**.

## Complete Streets

After World War II, many communities were designed with an orientation toward automobile travel rather than pedestrian accessibility. As a result, many communities lack sidewalks, safe crossings, bike lanes, and transit amenities. Car-dominated communities have become burdened with high-speed traffic, congestion, air pollution, and less-active lifestyles.

## SR 26 West of Tyler Drive

### Ocean View Sussex County

[> location on Google Map](#)

Destination-oriented places such as retail shops, local attractions, public spaces, parks, and residential neighborhoods can generate pedestrian activity and demand for a multi-modal environment.

The “before” photo shows commercial development along Delaware SR 26 that is within proximity to local destinations such as tourist attractions, recreational areas, beaches, retail establishments, and restaurants. The “after” photo shows how a complete street can promote a vibrant multi-modal environment that creates appeal for walkers and cyclists, connections to destinations, linkages to transit, and attractive streetscapes.

Note: These are conceptual renderings, not actual “engineered” designs.
