EXECUTIVE SUMMARY

In 2016, 46 Delaware nursing homes operated a total of 4,876 licensed beds. The majority of Delaware nursing homes – 44 out of 46 – were privately owned and operated in 2016. Privately-owned licensed beds accounted for 94.1 percent of all licensed nursing home beds in Delaware. Delaware’s two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically Ill) accounted for the remaining 5.9 percent of statewide nursing home beds. Since 2006, overall occupancy rates for private nursing home facilities in all three counties have hovered near 90 percent.

In 2016, a total of 11,513 patients were admitted to Delaware nursing homes. Of this total, white patients accounted for 70.9 percent of all admissions. Black patients and patients of other races accounted for 18.8 percent and 2.2 percent of 2016 nursing home admissions, respectively. Compared to their white counterparts, black patients and patients of other races admitted to Delaware nursing homes are younger on average. Similar demographic trends are observed for discharges from Delaware nursing homes.

The annual number of admissions to private Delaware nursing homes has substantially increased since 2006; however, increases in the number of admitted patients have been most dramatic in Kent and Sussex Counties. From 2006-2016, the annual number of admissions to private nursing homes in Kent and Sussex Counties increased 120.7 percent and 59.2 percent, respectively. Over the same time, the annual number of admissions to private nursing homes in New Castle County increased 16.4 percent. From 2015 to 2016, admissions to Delaware nursing homes fell slightly in New Castle and Sussex Counties (declines of 4.6 percent and 2.6 percent, respectively). From 2015 to 2016, admissions to private Kent County nursing homes increased 3.3 percent. The DHCC will continue to monitor annual nursing home admissions data to determine any newly-emerging trends.

The growing size and the changing demographics of Delaware’s population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. Between 2010 and 2050, Delaware’s total population is expected to increase 19.7 percent. Projected population growth is much more dramatic among older Delawareans. From 2010 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 102.5 percent (more than doubling from 130,137 to 263,517).

ACKNOWLEDGEMENTS

This report was funded by the Delaware Health and Social Services, Health Care Commission; it is the product of collaborative support from the Delaware Health Care Facilities Association, the Division of Services for Aging and Adults with Physical Disabilities, and all nursing home facilities across Delaware. The Health Care Commission wishes to thank these stakeholders and other subject matter experts who provided background information, analysis, and feedback to inform the development of this report.

I. INTRODUCTION

This, the 30th edition of the Delaware Nursing Home Utilization Statistical Report, summarizes 2016 data submitted by Delaware nursing homes¹. On a monthly basis, from January through December 2016, Delaware nursing homes submitted utilization data to the Delaware Health Care Commission (DHCC). To accomplish this, the DHCC contacted nursing home facilities on the first day of each month via e-mail to request facility utilization data for the previous month; if a facility's monthly data submission was delayed, then follow-up contact was made via fax and telephone. Upon initial data submission, the DHCC converted the data to an electronic format and reviewed each facility's report for internal inconsistencies and unexpected changes in reported statistics. Any discrepancies were immediately communicated back to the facility with a request for updated data. After receipt of any updated data, a facility's report was considered complete for the month. At the end of the reporting year, the DHCC re-coded and tabulated data to yield annual utilization data by facility and county.

This report presents 2016 Delaware nursing home data in two main sections. The **Facility Characteristics** section highlights historical trend data from 2006 through 2016. The majority of data presented in this section are aggregated to the state- and county-level, and primarily focus on indicators of utilization and patient demographics. The **Tables** section presents detailed facility-level measures, including total patient days, occupancy rates, percentage of patients by source of payment, and annual admission and discharge totals. Note that percentages in any given data category may not sum to 100 percent due to numerical rounding. Refer to Appendix A for changes in facilities' names and/or number of licensed beds that occurred in 2016.

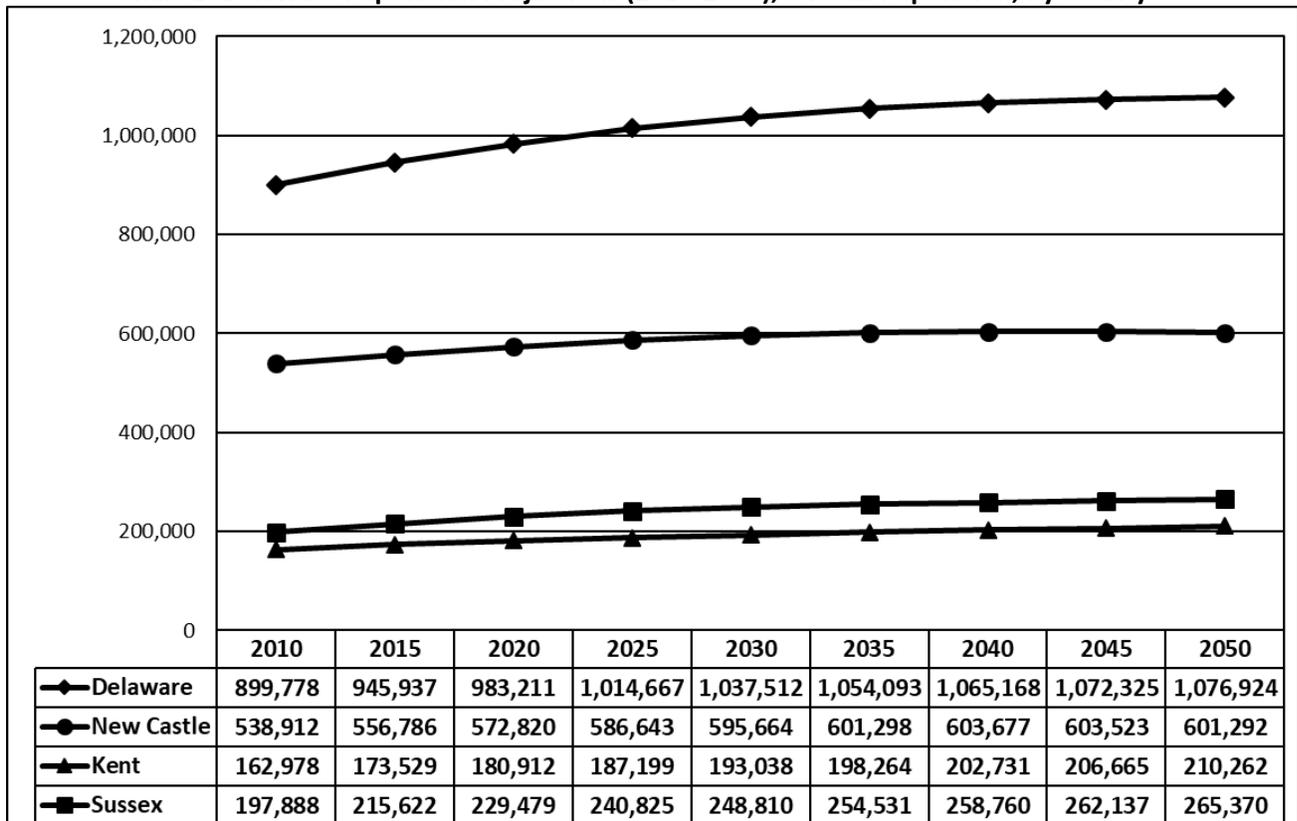

¹ Excluded from this report are facilities that serve individuals under the age of 18, as well as Intermediate Care Facilities for Individuals with Intellectual Developmental Disabilities (ICF/IID). ICF/IID facilities provide active and comprehensive and individualized treatment and rehabilitation services to promote functional status and independence.

STATEWIDE POPULATION PROJECTIONS

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. The following two charts, derived from Delaware Population Consortium data, provide the context within which to evaluate the availability of facilities for the elderly. Chart 1 shows the projected increase of Delaware's total population from 2010 to 2050. Chart 2 shows the projected population increase over the same time period specifically among Delawareans age 65 and older.

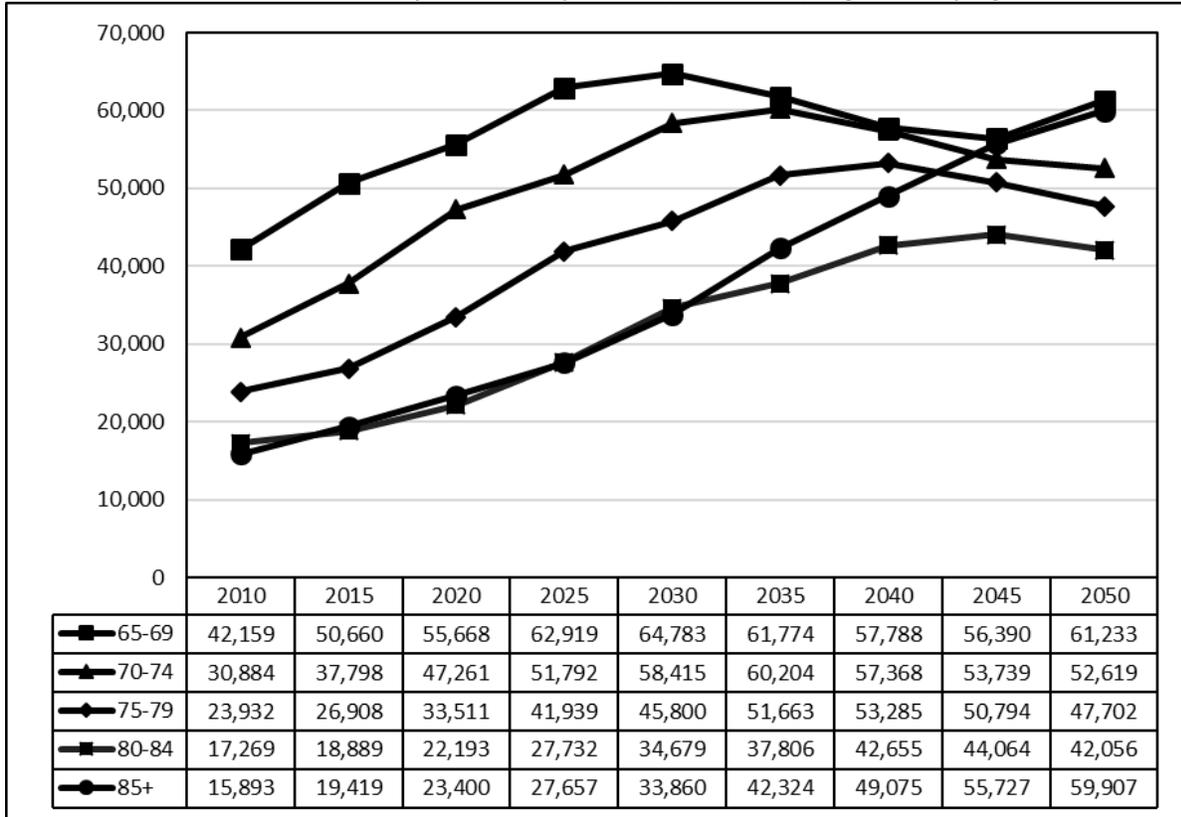

Between 2010 and 2050, Delaware's total population is expected to increase 19.7 percent (from 899,778 in 2010 to 1,076,924 in 2050). Overall population growth is distributed unevenly across Delaware's counties; from 2010-2050, Kent and Sussex Counties are expected to experience a 29.0 percent and 34.1 percent increase in total population, respectively. Total population growth for New Castle County is estimated at 11.6 percent over the same time period. Projected population growth is much more dramatic among older Delawareans. From 2010 to 2050, the statewide population of Delawareans age 65 and older is expected to increase 102.5 percent (more than doubling from 130,137 to 263,517). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2010 and 2050, statewide percentages of residents age 75-79, 80-84, and 85+ are projected to increase 99.3 percent, 143.5 percent, and 276.9 percent, respectively.

II. FACILITY CHARACTERISTICS

NUMBER OF NURSING HOME BEDS

In 2016, 46 Delaware nursing homes operated a total of 4,876 licensed beds. The majority of Delaware nursing homes – 44 out of 46 – were privately owned and operated in 2016. Privately-owned licensed beds accounted for 94.1 percent of all licensed nursing home beds in Delaware. Delaware’s two publicly-operated nursing home facilities (Governor Bacon Health Center and the Delaware Hospital for the Chronically Ill) accounted for the remaining 5.9 percent of statewide nursing home beds.

UTILIZATION

A commonly-used measure of nursing home utilization is the number of billable patient days generated by a facility over a given time period. A billable patient day represents a unit of time (i.e., one day) during which the facility’s services are used by one patient. For example, if a nursing home has 100 patients on a particular day, the facility has generated 100 billable patient days for that particular 24-hour period. If a facility’s number of billable patient days increases from one time period to the next, it is an indication that the facility is caring for more patients, caring for patients for longer periods of time, or a combination of these two factors. Mathematically, billable patient days per facility per year are calculated by summing each facility’s monthly billable patient days over a 12-month period.

Long-term trends reveal sizeable shifts in the number of patient days by county and facility type. From 2006-2016, New Castle County and Sussex County private nursing homes experienced a 6.5 percent and 9.6 percent increase in billable patient days, respectively. During the same time period, private nursing homes in Kent County experienced a substantially larger 28.3 percent increase in billable patient days. From 2006 to 2016, billable patient days among Delaware’s public nursing homes declined 50.7 percent.

OCCUPANCY

Occupancy rates are helpful for putting facilities’ utilization data within the context of available resources. A facility’s occupancy rate reflects the percentage of available beds occupied by patients throughout the reporting year. Occupancy rates were weighted based on the number of days a facility was open during the reporting year. Mathematically, for facilities that were open 365 days of the reporting year,

Weighted Occupancy Rate = [(Number of Billable Patient Days) / (Number of Licensed Bed Days)] * 100%
 where (Number of Licensed Bed Days) equaled the number of licensed beds in a facility (calculated as the average number of beds over the entire 12-month period) multiplied by 365. If a facility was open fewer than 365 days of the reporting year, the same weighted occupancy formula was used with the exception that (Number of Licensed Bed Days) equaled the number of licensed beds multiplied by the actual number of days the facility was open.

Since 2006, overall occupancy rates for private facilities in all three counties have hovered near 90 percent. From 2006 to 2016, the overall occupancy rate for private facilities fluctuated only slightly (ranging from a 2.2 percent decline in New Castle County to a 0.2 percent increase in Kent County). Over the same time period, Delaware’s public nursing homes have operated at occupancy rates ranging from a low of 51.5% (2013) to a high of 67.8% (2016). From 2006 to 2016, occupancy rates in Delaware’s three public facilities increased 7.4 percent; however, this reflects a reduction in licensed public nursing home beds, as well as the closure of one public facility (Emily P. Bissell Hospital in 2015), rather than an increase in admissions to public nursing homes (see Table 4 for additional details).

ADMISSIONS

The annual number of admissions to private Delaware nursing homes has substantially increased since 2006; however, increases in the number of admitted patients have been most dramatic in Kent and Sussex Counties. From 2006-2016, the annual number of admissions to private nursing homes in Kent and Sussex Counties increased 120.7 percent and 59.2 percent, respectively. Over the same time period, the annual number of admissions to private nursing homes in New Castle County increased 16.4 percent. From 2015 to 2016, admissions to Delaware nursing homes fell slightly in New Castle and Sussex Counties (declines of 4.6 percent and 2.6 percent, respectively). From 2015 to 2016, admissions to private Kent

County nursing homes increased 3.3 percent. The DHCC will continue to monitor annual nursing home admissions data to determine any newly-emerging trends.

While private nursing home admissions have increased 37.3 percent statewide since 2006, annual admissions to public nursing homes in Delaware have been more erratic. Since 2006, public nursing homes in Delaware have experienced substantial fluctuations in the number of patients admitted each year. Considering the most recent 11 years’ worth of data, the peak number of public nursing home admissions occurred in 2006 when 156 patients were admitted to Delaware’s three public nursing homes. In 2016, this number fell to 33 patients. Compared to 2006, 78.8 percent fewer patients were admitted to Delaware public nursing homes in 2016.

2006-2016 % Change	16.4%	120.7%	59.2%	37.3%	-78.8%	35.2%

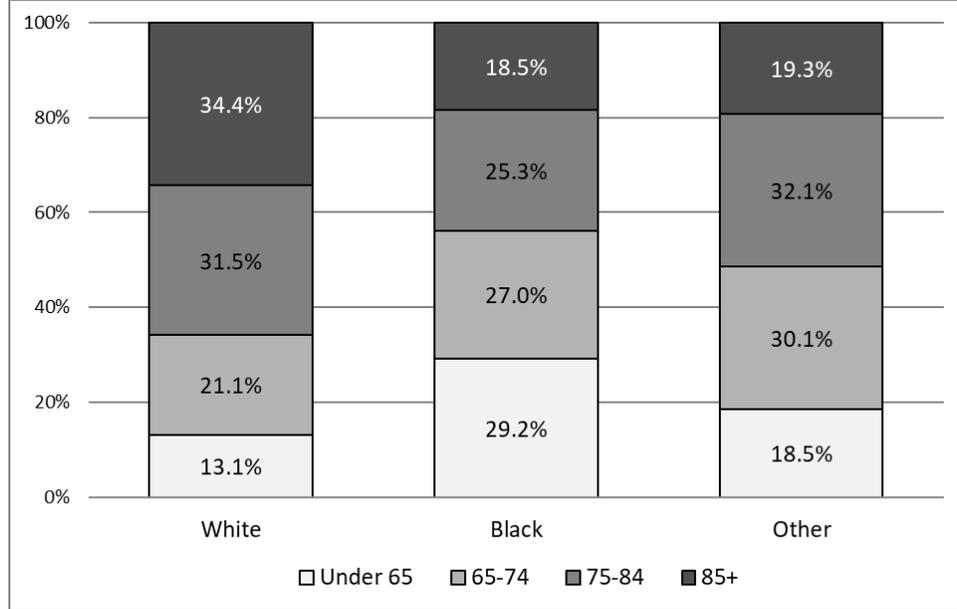

As shown in Table 5, white patients accounted for 79.0 percent of all Delaware nursing home admissions in 2016. Black patients and patients of other races accounted for 18.8 percent and 2.2 percent of 2016 nursing home admissions, respectively. When considering admissions by age, individuals 75-84 years and 85 years and over accounted for 30.3 percent and 31.1 percent, respectively, of all 2016 Delaware nursing home admissions. Just over one-fifth (22.4 percent) of 2016 nursing home admissions were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 16.2 percent of 2016 admissions.

Table 5: Percentage of Total Delaware Nursing Home Admissions, by Race and Age, 2016

	Age Groups				Total Admissions (by Race)
	Under 65	65-74	75-84	85+	
White Admissions (N=9,100)	13.1%	21.1%	31.5%	34.4%	79.0%
Black Admissions (N=2,164)	29.2%	27.0%	25.3%	18.5%	18.8%
Other Admissions (N=249)	18.5%	30.1%	32.1%	19.3%	2.2%
Total Admissions (by Age) (N=11,513)	16.2%	22.4%	30.3%	31.1%	100.0%

Although black patients and patients of other races comprised just one-fifth (20.9 percent) of all 2016 nursing home admissions combined, they represent an overall younger population compared to their white counterparts. As shown in Figure 2, in 2015, just 13.1 percent of all white nursing home admissions were individuals under the age of 65. Relative to this, individuals under the age of 65 accounted for 29.2 percent of black admissions. Among black patients admitted to Delaware nursing homes in 2016, 56.1 percent were individuals age 74 and under; in comparison, 34.2 percent of all white admissions represented individuals under the age of 74. In summary, while white patients accounted for substantially more nursing home admissions overall, black patients and patients of other races tended to be younger when they admitted to Delaware nursing homes.

DISCHARGES

In 2016, Delaware nursing homes discharged a total of 10,977 patients. Since 2006, the annual number of discharges from private Delaware nursing homes has increased across all three counties. From 2006-2016, Kent and Sussex Counties experienced the greatest increase in the number of annual private nursing home discharges (138.6 percent and 59.5 percent, respectively). Private nursing home discharges increased 7.3 percent in New Castle County over the same time period. Compared to 2006, Delaware’s public nursing homes experienced a 72.2 percent decline in the number of annual discharges; however, this decline in the number of discharges mirrors a similar decline in the number of annual admissions among Delaware’s public nursing homes. From 2015 to 2016, discharges from Delaware nursing homes fell 7.2 percent in New Castle and 3.0 percent in Sussex Counties. From 2015 to 2016, discharges from private Kent County nursing homes increased 4.3 percent. The DHCC will continue to monitor annual nursing home admissions data to determine any newly-emerging trends.

As in previous years, in 2015, discharge destination varied greatly by facility type (Table 7). Patients discharged from private facilities were far more likely to return home compared to patients discharged from public facilities (60.7 percent vs. 10.8 percent, respectively). Over half of all patients discharged from public nursing home facilities represented discharges due to death; among discharges from private nursing homes, 10.9 percent represented discharges due to death.

Table 7: Percentage of 2016 Nursing Home Discharges, by Discharge Destination

As shown in Table 8, 2016 discharge statistics mirror admission statistics in terms of patient race and age. White patients accounted for 78.6 percent of all Delaware nursing home discharges in 2016. Black patients and patients of other races accounted for 19.4 percent and 2.0 percent of 2016 nursing

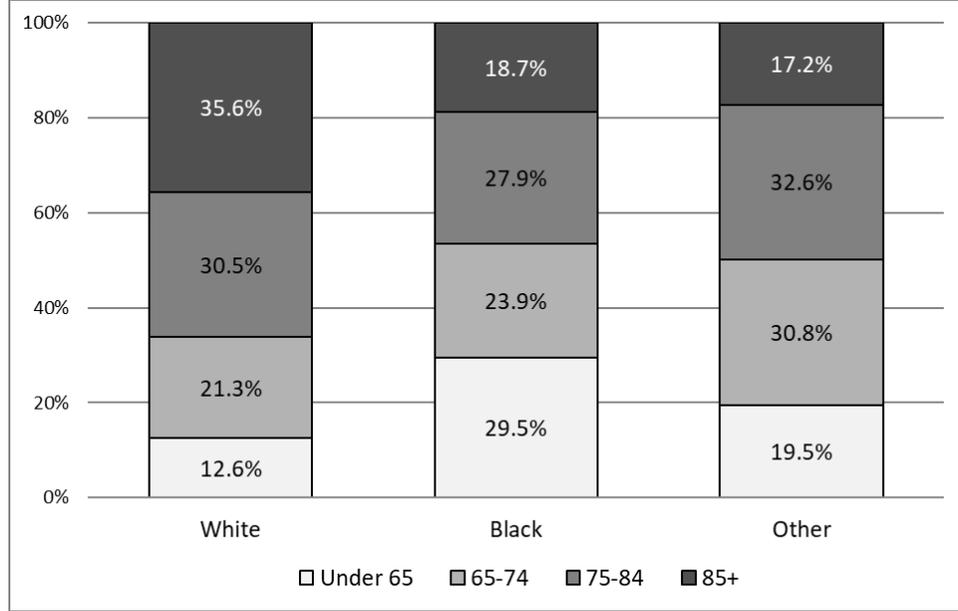

home discharges, respectively. When considering discharges by age category, individuals 75-84 years and 85 years and over accounted for 30.1 percent and 31.9 percent, respectively, of all Delaware nursing home discharges. Just over one-fifth (22.0 percent) of 2016 nursing home discharges were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 16.0 percent of 2016 discharges.

Table 8: Percentage of Total Delaware Nursing Home Discharges, by Race and Age, 2016

	Age Groups				Total Discharges (by Race)
	Under 65	65-74	75-84	85+	
White Discharges (N=8,627)	12.6%	21.3%	30.5%	35.6%	78.6%
Black Discharges (N=2,129)	29.5%	23.9%	27.9%	18.7%	19.4%
Other Discharges (N=221)	19.5%	30.8%	32.6%	17.2%	2.0%
Total Discharges (by Age) (N=10,977)	16.0%	22.0%	30.1%	31.9%	100.0%

The age breakdown among white, black, and other race patients discharged from Delaware nursing homes in 2016 is similar to that among nursing home admissions. Black patients and patients of other races discharged from Delaware nursing homes represent an overall younger population. Approximately 30 percent of black patients and 20 percent of patients of other races discharged from nursing homes were under the age of 65, whereas only 12.6 percent of white patients discharged from Delaware nursing homes fell into this youngest age category. In 2016, 53.4 percent of black patients discharged from Delaware nursing homes were under the age of 75; in comparison, 33.9 percent of white patients discharged from Delaware nursing homes were under the age of 75. In summary, while white patients accounted for substantially more nursing home discharges overall, black patients and patients of other races discharged from Delaware nursing homes represent a younger population in general.

SOURCE OF PAYMENT

Patient payment for nursing home care varies by type of facility. In 2016, the overwhelming majority (87.2 percent) of patients in public Delaware nursing homes used Medicaid as a source of payment; among patients at private Delaware nursing homes, just under 60 percent utilized Medicaid funds. Although the percentage of private nursing home patients using Medicare has increased slowly since 2006, Medicare is still not a major payer of nursing home care in Delaware. In 2016, 1.1 percent and 17.6 percent of patients in public and private nursing homes, respectively, used Medicare as their source of payment. Approximately 4 percent of public nursing home patients self-paid for their care, compared to 17.8 percent of private nursing home patients. Between three and five percent of patients in both public and private nursing homes used a different source of payment for their care.

Notes: NCC=New Castle County. Weighted occupancy rates for individual facilities are calculated as the ratio of Billable Patient Days and Licensed Bed Days. Licensed Bed Days are calculated as (Number of Licensed beds (as of December of the reporting year))*(Total days the facility was open during the reporting year). Weighted occupancy rates at county, facility type, and state levels are calculated as the ratio of Billable Patient Days (sum of each facility in the category) and Licensed Bed Days (sum of each facility in the category).

Notes: The "other" payment category includes charitable pay, partial pay, private insurance, Veterans benefits, out-of-state Medicaid, and, in some cases, patients for whom medical status was pending at admissions. Percentages reported in this table are based on end of month reports on the number of patients by source of payment.
