

DDDS Advisory Council

Member: Brian Freedman, Ph.D.

Brian Freedman, Ph.D., designs and leads training initiatives, systems change projects, and innovative service models at the University of Delaware Center of Disabilities Studies. He and his team create college and career exploration programs for students with disabilities, including autism and intellectual disabilities. Brian is the Co-Director of the Delaware Leadership Education in Neurodevelopmental Disabilities (LEND) program, which provides training to students, professionals, self-advocates and family members. He also collaborates with Delaware state agencies, advocacy organizations and hospital systems to influence systems of care and promote inclusive community living. Brian is a faculty member in UD's School of Education and teaches in the Disability Studies minor.
