

FREQUENTLY ASKED QUESTIONS

DOES MY CHILD NEED A DEVELOPMENTAL SCREENING?

If my child is receiving services through Child Development Watch and has an Individualized Family Service Plan (IFSP), do I need a screening?

No, your child has already received a developmental screening through a Multi-disciplinary Assessment, or MDA. By gathering information about your child through observations and conversations you and your IFSP team identified your child's unique strengths and needs. This information was used to develop the outcomes and services identified on your IFSP.

Q

If my child is receiving services through the school district and has an Individualized Education Program (IEP), do I need to get a developmental screening?

You should speak with your child's teacher, or the district's Child Find Coordinator to determine if your child would benefit from developmental screening.
