INTERVIEWER NOTE: If asked about definition of transgender:

Some people describe themselves as transgender when they experience a different gender identity from their sex at birth. For example, a person born into a male body, but who feels female or lives as a woman would be transgendered. Some transgender people change their physical appearance so that it matches their internal gender identity. Some transgender people take hormones and some have surgery. A transgender person may be of any sexual orientation — straight, gay, lesbian, or bisexual.

**INTERVIEWER NOTE: If asked about definition of gender non-conforming:**
Some people think of themselves as gender non-conforming when they do not identify only as a man or only as a woman.

**State-Added 2: Sexual Violence**

Now I’d like to ask you two questions about sexual violence or unwanted sexual experiences. This information will allow us to better understand the problem of violence and unwanted sexual contact—and may help others in the future. This is a sensitive topic. Some people may feel uncomfortable with these questions. At the end of this section, I will give you a phone number for organizations that can provide information and referral for these issues. Please keep in mind that if you are not in a safe place you can ask me to skip any question you do not want to answer.
