## I. PREFACE

This is the twenty-fourth edition of the Delaware Nursing Home Utilization Statistical Report. The report presents characteristics of Delaware's nursing homes and their patients. The data in this report does not include Intermediate Care Facilities for the Mentally Retarded (ICFMR). ICFMR facilities provide active treatment services to people with mental retardation and other related conditions causing adaptive behavior similar to that of the mentally retarded person which manifests before the person reaches the age of 22. Also, the report does not include data from facilities that serve the population under 18.

The Bureau of Health Planning & Resource Management has contracted with the University of Delaware's Center for Applied Demography & Survey Research to collect the data, provide data entry and verification services along with data tabulation and analysis.

The source of information for year 2010 encompassed in this document is monthly utilization statistical reports by Delaware nursing homes submitted to the University of Delaware's Center for Applied Demography & Survey Research. The center obtained a list of licensed nursing facilities at the beginning of the year from the Bureau of Health Planning & Resource Management. All changes to the list of licensed facilities, including name changes and changes in the number of licensed beds were communicated to the center by the bureau. Facilities were contacted on a monthly basis with requests sent the first day of the month. A combination of methods was used to contact the facilities on the list. The method was a combination of standard mail and e-mail, followed up by fax and phone. Using these methods, the center achieved full compliance from all facilities for all 12 months. When reports were received from individual facilities, the reports were checked for internal inconsistencies or unexpected changes in reported statistics. These discrepancies were immediately communicated back to the facilities with explanation and a request to update the data. Once an updated report was received by the center, the report was considered complete. All data collected was converted to an electronic format if not done so by the facility and then manually verified for consistency and accuracy. At the end of the reporting year, the data was recoded as needed and tabulated.

This report presents the collected data in two sections. The Facility Characteristics section of this report focuses on data from 2000 through 2010. Most of the summary presented here focuses on aggregated data for all nursing homes in Delaware, particularly:

- (1) Facility characteristics (number of homes and beds by ownership)
- (2) Utilization data (patient days, occupancy, admissions and discharges)
- (3) Patient characteristics (age, gender and source of payment)

The section entitled Tables presents summary characteristics such as total patient days, occupancy rate, and patients by source of payment, along with number of admissions and discharges for each facility.

Note:

Percentages in the report may not add up to 100% due to rounding.

When making year to year comparisons, refer to Appendix A for changes in facility names and/or number of licensed beds.

## **STATE POPULATION**

The growing size and the changing demographics of Delaware's population is central to the understanding of the distribution of nursing homes (and for that matter assisted living and rest residential facilities), the number of licensed nursing home beds and their utilization. To provide the context within which to evaluate the availability of facilities for the elderly, we are including two charts. The first chart presents the growing trend in the size of Delaware's total population. Chart two presents the growing number of those who are aged 65 and above. In both cases, significant increases are estimated. First, the estimates by the Delaware Population Consortium indicate a 42% jump in the total number of Delawareans from 2000 to 2040. The growth is distributed unevenly across counties. Sussex County's total population growth during this time period is estimated at 96%, with Kent County following at 61% and New Castle County following at 21%. Looking at the total number of Delawareans aged 65 and above, the change is even more dramatic. Based on the numbers from the Delaware Population Consortium, it is estimated that the population of Delawareans aged 65 and above will grow 175% (103,269 to 283,611) from 2000 to 2040.

**II. FACILITY CHARACTERISTICS**

**NUMBER OF NURSING HOME BEDS**

The number of nursing homes in Delaware decreased from 47 in 2009 to 46 in 2010. The number of licensed beds decreased from 5,021 in 2009 to 4,986 in 2010. Of the total beds, approximately 87.5% were privately owned in 2009 with no change for 2010. Correspondingly, the percentage of beds in public facilities decreased from 12.5% in 2009 to 11.9% in 2010.

**UTILIZATION**

For private and public facilities together, the number of patient days increased by 0.7% between 2009 and 2010. The number of patient days in private facilities increased by 0.8%. Looking at private facilities by county, the growth was unevenly distributed - there was a 1.7% increase in New Castle County, a 0.2% decrease in Kent and a 0.5% decrease in Sussex County. The public facilities experienced a decrease of 0.7% from 2009 to 2010.

Occupancy rates presented here are calculated as:  $(\text{Number of Patient days}/(\text{Number of beds} \times 365)) \times 100$ . This calculation assumes that all facilities were open 365 days and that number of licensed beds did not vary throughout the year.

\* Please note that facilities closing or changes in the number of licensed beds can influence the above occupancy rates. For details on these changes please see Appendix A.

**ADMISSIONS**

Between 2009 and 2010 the number of admissions among all facilities in Delaware increased 8.3%. Admissions to private facilities increased by 8.1% while admissions to public facilities increased 32.2% between 2009 and 2010. Comparing admissions from a decade ago, the number of admissions combined for all facilities increased by about 70%. Admissions at public facilities declined 15%, while admissions at private facilities grew by about 72%.

The percent of patients admitted to Delaware nursing homes by race within specific age groups is presented in the figure below. About 11.5% of whites admitted to Delaware's nursing homes are under age 65, while about 25% of blacks admitted to nursing home are in this age group. Clearly, the age of patient admission to nursing homes in Delaware varies by race. Blacks tend to enter nursing homes in Delaware at a younger age than whites. Of the black admissions in 2010, 52% were less than 75 years of age, compared to 28.3% for whites.

Although blacks are admitted to Delaware nursing homes at a younger age, the percent of black admissions (from all admissions) is lower than white admissions in all age groups as indicated in the figure below. This figure shows the percent of all patients admitted to Delaware nursing homes in the year 2010 by race and age. From all admissions to Delaware nursing homes, only 4.1% were black and under 65 while more than double (9.4%) are whites in the same age category.

**DISCHARGES**

The number of patients discharged from nursing homes across Delaware increased from 10,006 in 2009 to 11,048 in 2010 (10.4% increase). The number of patients discharged from private facilities increased 10.4% (from 9,902 in 2009 to 10,931 in 2010) and the number of patients discharged from public facilities increased 12.5% (from 104 in 2009 to 117 in 2010). The change in the number of discharges between 2009 and 2010 from private facilities varies significantly across counties. Discharges from private facilities in New Castle County increased by 9.8%, in Kent County increased by 26%, and in Sussex County increased by 5.9%.

The proportion of patients discharged to different destinations varies by the type of facility. For example, patients in public facilities are less likely to be discharged to home (13.7% from public and 50.5% from private) or hospital (7.7% from public, 30.2% from private) and more likely to be discharged due to death (39.3% from public, 11.8% from private) or a State owned LTCF (25.6% from public, 0.3% from private) than their counterparts in private facilities.

**SOURCES OF PAYMENT**

The source of payment for nursing home care varies by type of facility. In private facilities, approximately 53.3% of the residents had Medicaid as the source of payment, while 80.7% of patients in public nursing homes paid by Medicaid in 2010. About 22.5% of patients in private facilities were self-pay in 2010, while only 16.3% of patients in public facilities were self-pay. Medicare is not a major payer of nursing home care. In 2010, Medicare was the source of payment for only 16.6% of all patients. In private facilities, about 18.1% of patients were paid by Medicare, and in public facilities only 0.5% were paid by Medicare. However, the percent of Medicare patients has changed considerably since 2000 when the percentage of patients with Medicare as a source of payment stood at 9.5%.

The chart below tabulates the estimates of Medicaid patient days for Delaware’s public and private facilities for the period of 2000 to 2010. Please note that the counts of Medicaid days are based on end of month reporting. To estimate the patient days, it was assumed that those who were reported to be at the facility at the end of the month were also there for the whole month. This assumption very likely overstates the number of Medicaid patient days. However, the expectation is that the assumption does not impact the magnitude of the difference between private and public facilities.

**Medicaid Patient Days 2000-2010**

**Note:** Calculation adjustment made from the 2009 DE Nursing Home Utilization Statistics Report where the Public Medicaid Patient Days was reported as 99,611 but correct figure is 102,087.

**Occupancy rates for individual facilities** are calculated as ratio of Billable Patient days and Licensed bed days. Licensed bed days are calculated as Licensed beds (December) multiplied by the Total (actual) days facility was open during the year. The **Occupancy rates (weighted)** at County, State level, Type is calculated as the ratio of Billable Patient Days (sum for each facility in the geography) and Licensed Bed days (sum for each facility in the geography).
