

## OFFICE OF ENGINEERING

### PLUMBING PERMIT AND INSPECTION PROGRAM

## ATTENTION PLUMBERS

Beginning January 1, 2017 there will be a new application process for Commercial plan review. All Commercial applications will need to go through Plan Review. All plan review applications must be submitted to the Office of Engineering at 43 South DuPont Hwy Dover, DE 19901 for the plan review. Once the Plan Review has been done an ATC

(Approval to Construct) number will be issued and sent back to the applicant with the stamped plans. Only then can the Commercial Plumbing Permit be issued. All Commercial permit applications **must** be submitted with an approved floor plan. Please be advised that this process may take some time, plan accordingly. If you have any questions regarding this process, please contact the Office of Engineering at 302-741-8640.
