GENERAL INFORMATION

The consumer MCI number is repeated on all sheets so that pages which become separated may be matched to each other.

What follows is a brief description of each item. Most items have codes for “unknown” and infrequently a code for “not collected”. It may not be clear when to use “not collected”. Unknown is meant for those situations when you simply do not collect this information. Its use is discouraged. For example, if your organization does not determine someone's Medicaid number, this field would be filled in with 999998 (making 999999998M). This allows us to know that you did not leave the field blank accidentally but in fact do not collect that information. Use the code for unknown for those items that you ordinarily collect but which is missing for this one consumer.

IMPORTANT TIPS FOR COMPLETING THE ANNUAL CRF FORM:

The acceptable default date fields are 06/06/2666, 07/07/2777 and 08/08/2888. For sections of the form where only a two character century date is allowed, you should enter 06/06/66, 07/07/77 and 08/08/88.

Generally the codes “UNKNOWN” should not be used for required fields.

If you don't use an "optional" field, fill in a default value, such as "NONE" or "UNKNOWN."
**DATA ITEMS**

Treatment Unit Name: Your organization’s name. A treatment unit is defined as an identifiable organization or unit of an organization that usually resides at a single location (which it may share with other organizations) and is an identifiable cost center. A distinguishing characteristic of treatment units is that consumers do not move readily between them and the organization usually requires that some transfer paperwork be generated for such a move. Each treatment unit may offer a variety of services such as group therapy, job skills training, etc. such that every consumer in the unit may not receive exactly the same mix of services. Consumers may, in fact, receive services from more than one treatment unit simultaneously. The key to this definition is the organization’s perception of that organizational unit has responsibility for the treatment of this consumer.
