NOTE: The data provided may not be a true reflection of the total number of people who have been infected with influenza virus in Delaware, chiefly due to the following:

- Many people ill with influenza-like symptoms do not seek medical care; and
- Many who do seek medical care are not tested for influenza.

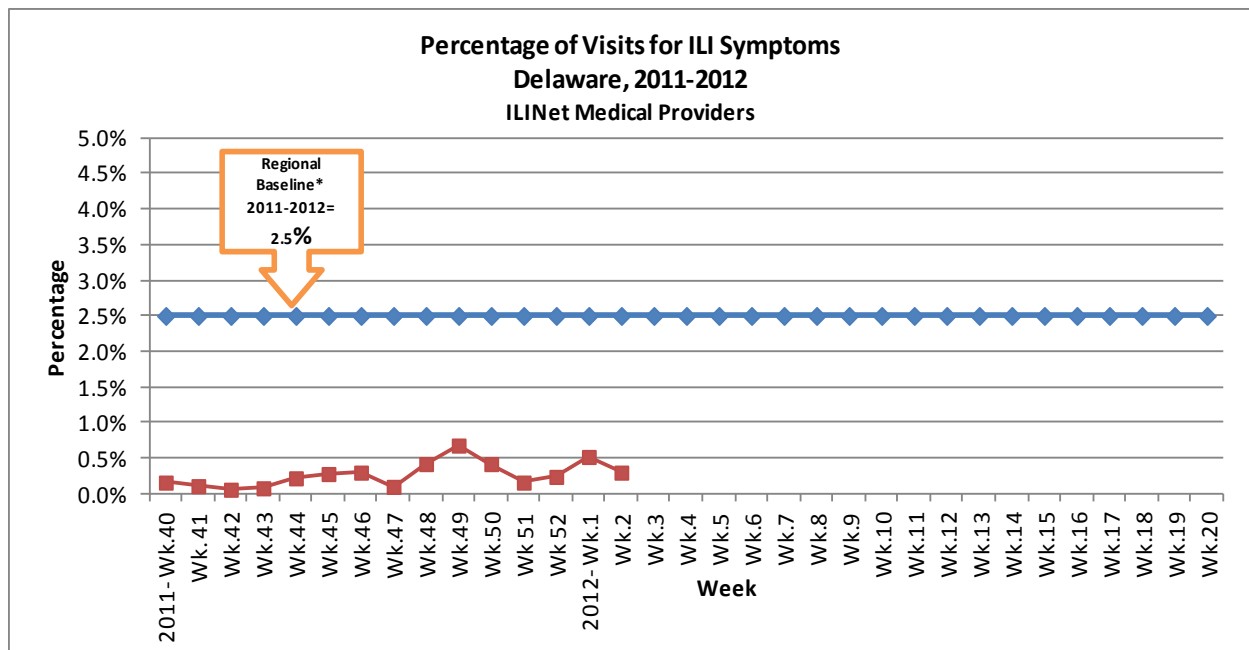

Level of Influenza Activity in Delaware, Week 02, 2012:

No Activity	➡ : No laboratory confirmed cases of influenza and no increase in the number of reports of ILI above regional baseline for the season.
➡ Influenza-like illness (ILI) is defined as patients presenting with fever over 100° F, cough and/or sore throat in the absence of a known cause other than influenza.	
<ul style="list-style-type: none">➡ No Activity: No laboratory confirmed cases of influenza and no increase in the number of reports of ILI above regional baseline for the season.➡ Sporadic: Isolated laboratory confirmed cases <u>OR</u> a laboratory confirmed outbreak in one institution but no increase in reports of ILI from the regional baseline for the season.➡ Local: Increased ILI above the regional baseline for the season in a single county; ILI activity in other counties is not increased above baseline AND recent (within the past three weeks) laboratory evidence of influenza in the county with increased ILI <u>OR</u> two or more institutional outbreaks (ILI or laboratory confirmed flu) in a single county AND recent (within the past three weeks) laboratory evidence of influenza in the county with the outbreaks; virus activity is no greater than sporadic in other counties.➡ Regional: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least 2 but less than half the regions of the state. (This level of activity does not apply for small states with 4 or fewer regions.)➡ Widespread: Increase in ILI reports above the regional baseline and/or institutional outbreaks of influenza (ILI or lab confirmed) AND recent (within the past 3 weeks) laboratory confirmed influenza in at least two of the three counties.	

ILINet (Sentinel) Provider Surveillance Network:

An ILINet provider conducts surveillance for ILI in collaboration with the state health department and the Centers for Disease Control and Prevention. Data reported by ILINet providers, in combination with other influenza surveillance data, provide a national and statewide picture of influenza virus and ILI activity in the U.S.
