ACKNOWLEDGMENTS

This report was prepared by Barbara Gladders and Maridelle Dizon, and reviewed by Denese Welch of the Delaware Health Statistics Center.

We gratefully acknowledge the contributions of Brenda Conner and the staff of the Office of Vital Statistics, Edward C. Ratledge and the staff of the Center for Applied Demography and Survey Research at the University of Delaware, and the Health Statistics Center staff, including: Jean Hreczan, Louise Wishart, Rosemary Zimmermann, Genelyn Viray, and Georgette Ahiamadjie. We also recognize local registrars, physicians, nurses, medical records staffs, midwives, funeral directors, and county clerks for their help in collecting and providing us with these data. Finally, special thanks go to the Delaware Tourism Office for providing the cover photograph.

REPORTED PREGNANCIES

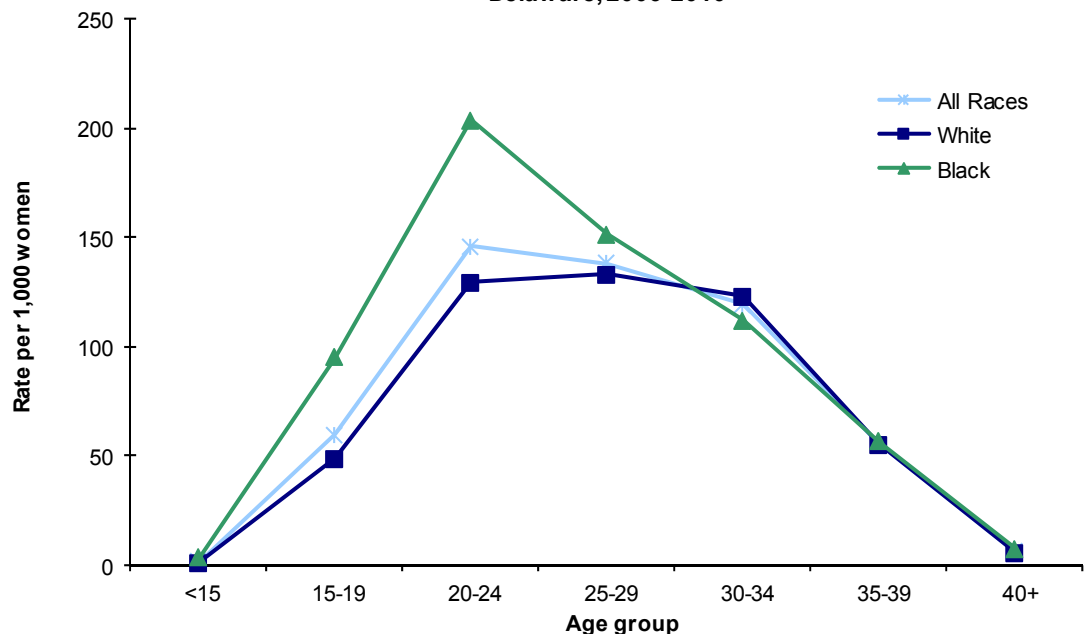

At 87 reported pregnancies per 1,000 women ages 15-44, the 2006-2010 rate of reported pregnancies remained stable. Although pregnancy rates of black mothers were significantly higher than those of white mothers in every county, New Castle County's difference between white (76) and black (109) was the largest.

**Five-year Average Rate of Reported Pregnancies by Race
Delaware and Counties, 2006-2010**

Source: Delaware Health Statistics Center

**Five-year Average Rate of Reported Pregnancies by Age and Race
Delaware, 2006-2010**

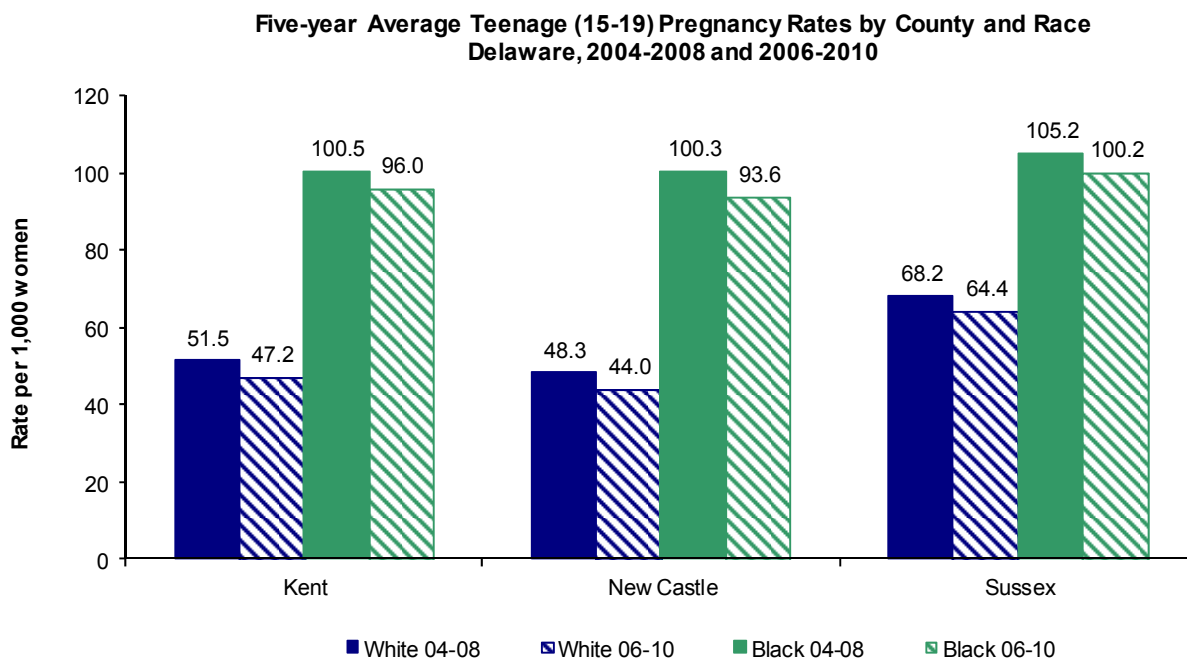

Source: Delaware Health Statistics Center

For women of all races, the 20-24 year age group had the highest pregnancy rate, at 146 pregnancies per 1,000 women in 2006-2010.

With the exception of the 30-34 age group, black women had higher pregnancy rates than white women.

REPORTED PREGNANCIES

Teen (15-19) pregnancy rates for all race and county groups declined between 2004-2008 to 2006-2010. In 2006-2010, New Castle County had the lowest reported pregnancy rates for both black and white teens. With the exception of Sussex County, where white teen pregnancy rates were the highest, black teen pregnancy rates were twice that of white teens.

Source: Delaware Health Statistics Center

- ▶ The five-year average (2006-2010) pregnancy rate for younger teens aged 15-17 was lowest in Kent County, with 29.3 pregnancies per 1,000 females, followed by New Castle County, with a rate of 32.2, and Sussex County, with a rate of 36.8 (see Table D-7). The rates decreased in all three counties between 2004-2008 to 2006-2010.
- ▶ The five-year average (2006-2010) pregnancy rate for older teens aged 18-19 was lowest in New Castle County (93.2 pregnancies per 1,000 females), and highest in Sussex County (123.5). See Table D-7.
- ▶ In 2010, there were 4,666 abortions performed in Delaware: 3,553 to Delaware residents and 1,113 to non-residents.
 - Over half of all pregnancies to females under 15 ended in termination.
 - ⇒ 44 percent of pregnancies to white females under 15, and 58 percent of pregnancies to black females under 15, ended in terminations.
 - Married women undergo significantly fewer terminations than their single counterparts.
 - ⇒ 3.9 percent of pregnancies to white married women ended in termination and 11.2 percent of pregnancies to black married women ended in termination.
 - ⇒ When the women were unmarried, these numbers increased to 32.6 and 42.1 percent respectively.
 - There were 62 fetal deaths of Delaware residents in 2010.
 - There were 11,291 live births to Delaware residents in 2010.

Notes:

- Percentages may not add to 100% due to rounding.
- Percentages are calculated based upon the total number of pregnancies within each race-age category.
- Percentages for the age categories "<15" and "40+" may be misleading due to the small number of pregnancies in this category.
- *Women of Hispanic origin may be of any race.

Notes:

1. Reported pregnancies include live births, fetal deaths, and induced terminations of pregnancy.
2. For Delaware and counties, pregnancy rates represent the number of reported pregnancies to women of all ages per 1,000 women 15-44 years of age in the population.
3. For each age group, the denominator for the pregnancy rate is the total number of women in the county/state within that age category except the "<15" and "40+" age categories which are based on women ages 10-14 and 40-49, respectively.

PRACERAT5

Notes:

1. Reported pregnancies include live births, fetal deaths, and induced terminations of pregnancy.
2. For Delaware and counties, pregnancy rates represent the number of reported pregnancies to women of all ages per 1,000 women 15-44 years of age in the population.
3. For each age group, the denominator for the pregnancy rate is the total number of women in the county/state within that age category except the "<15" and "40+" age categories which are based on women ages 10-14 and 40-49, respectively.
4. Comparisons using rates for the "<15" and "40+" age categories may be misleading due to the small number of events in these categories.

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of induced terminations of pregnancy in each race category.
3. Percentages for the race category "Other" may be misleading due to the small number of induced terminations of pregnancy in this category.
