

The Delaware Division of Public Health, Office of Emergency Medical Services and Hospital Preparedness is issuing this information guide to assist licensed and authorized providers in locating COVID-19 therapeutics in their practice areas.

Summary

The Office of the Assistant Secretary for Preparedness and Response has created a national map that displays public locations that have received shipments of U.S. Government-procured COVID-19 therapeutics. The currently available therapeutics displayed within the map are the long-acting antibody combination, evusheld; monoclonal antibody treatments, bebtelovimab and sotrovimab; as well as the oral antiviral therapies, paxlovid and molnupiravir. As products authorized for either prevention or treatment of COVID-19 become available or are paused based off current variant trends, [the therapeutics locator](#) will have the most up to date information.

Background

Federally allocated COVID-19 therapeutics are processed and recorded through two systems, Tiberius, and Health Partner Ordering Portal (HPoP). Once reported by the receiving agency, the individual therapeutic, along with the number of available doses, is made public for provider information by signing into the COVID-19 Therapeutics Locator. Patients should not contact locations directly unless instructed to do so by their health care provider.

Directions:

Licensed and authorized providers can access the therapeutics locator by using the link:

<https://covid-19-therapeutics-locator-dhhs.hub.arcgis.com/>.

Once on the site, the provider will select Delaware in the box that is labeled “State, Territory, or Jurisdiction” and then move to the box labeled Therapeutic Selector and choose a specific therapeutic or view all available treatment option in the selected area.

A map of Delaware will appear identifying the locations in the state that have COVID-19 therapeutics available. The provider can click on the map itself to see which locations closest to their practice can provide the requested treatment therapy. To the right of the map is a key identifying the specific therapeutic available. To the left of the map the number of locations is identified, along with their names, addresses, and therapeutics on hand in quantities

Additional Resources

Information related to government issued COVID-19 therapeutics can be found on:

[COVID-19 Therapeutics | HHS/ASPR.](#)

The data available is based on stock as reported by the location and is no guarantee of availability.
