Notes:

1. Teenage live birth rates represent the number of live births in a specific age category (e.g., 15-19) per 1,000 women in that age category.
2. Historical rates may change from one annual report to another due to refinements in the population estimates.
Therefore, historical trends should not be examined by comparing rates from previous annual reports.
3. N/A indicates data not available.
4. *Indicates U.S. data are preliminary.

Notes:

AGEFERT3

- General fertility rates represent the total number of live births per 1,000 women 15-44 years of age.
- Age-specific live birth rates represent the number of live births in a specific age category per 1,000 women in that age category.
- Historical rates may change from one annual report to another due to refinements in the population estimates. Therefore, historical trends should not be examined by comparing rates from previous annual reports.
- *Indicates U.S. data are preliminary.

Notes:

1. Percentages may not add to 100% due to rounding.
2. Percentages are calculated based upon the total number of births in each race/origin category.
3. Percentages for the categories "Other" and "Hispanic" should be interpreted with caution due to small numbers.
4. *Mothers of Hispanic origin may be of any race. See Hispanic Origin and Race in the Technical Notes.
