Specialized Medical Equipment/Supplies			Manual Pricing		
Home or Vehicle Modifications			Manual Pricing		

* Where the billing unit is reported as a per diem with an asterisk, it means that the per diem paid to the provider is determined by multiplying the computed hourly rate by the number of approved hours per day of direct support the provider is expected to provide for the member. DDDS uses the Inventory for Client and Agency Planning (ICAP) to determine the support hours for each member.

Service rates with a label of "RBT" and "ASL" mean that the person delivering the direct support to the member is either certified by the Behavior Analyst Certification Board (BACB) as a Registered Behavior Technician® (RBT®) or is fluent in American Sign Language (ASL) for members who use ASL to communicate. These services are paid at a higher rate.

Note: ** The Delaware legislature increased the State minimum wage to \$15/hr effective 1/1/2025. Therefore, all DDDS rates that were based on a wage less than \$15/hr were leveled up to \$15/hr. The new rates for 1/1/2025 are shown in the right-most column. This impacted the HCBS rates for Residential Habilitation and Facility-Based Day Habilitation/Prevocational Service.
