Q & A

EVV Statistics

- EVV Statistics as of July 28, 2025
 - 1,803,843 visits submitted
 - 142 unique MCDIDs registered
 - 96 MCDIDs actively using system

EVV Statistics

KPI 1: Association of EVV Record to Claim/Encounter

- KPI 2: EVV Record Match against approved services, providers and units

Project Updates

- Sandata is now HHAeXchange
- HHO began sending remittance advice reason codes (RARC)s to indicate issues with matching
 - Follow up with HHO directly with any questions

Project Updates

- Change order for adding new procedure code/modifiers and to correct rounding rules is in Production
- Only a few providers are impacted
- Revised Alternate Specifications are being finalized

EVV Training—Aggregator

- Regardless of your EVV system, all providers need to access the Aggregator to verify that your visit data is being captured.
- All providers must complete training, even if you have experience using the system in another state. Aggregator Training is available at [Sandata Learn](#).

COURSE OUTLINE
Login and Navigation

- Welcome to the Sandata Aggregator course!
- Aggregator Introduction
- Initial Aggregator Login
- Reset Aggregator Password
- Aggregator Navigation

Security

- Create Aggregator User
- Editing Aggregator User
- Deleting Aggregator Users
- Aggregator User Roles
- Modify Aggregator User Role
- Delete Aggregator User Role

Visit Review

- Aggregator Visit Review Filter and Sort
- Aggregator Visit Review Grid
- Aggregator Visit Details

About the Course

This course includes all the features of how to use Sandata's **Aggregator**. Be aware that there may be features and/or functions displayed here that are **NOT** part of your programs configuration.

Delaware Aggregator Auto Verification Reports

Auto Verification Report Descriptions

Auto Verification Details Report

This report displays all visits for the selected date range and shows how they were confirmed (manually or automatically) as well as the number of manual updates made to the visit. The report allows users to review all visits in detail and monitor trends in how frequently manual updates are made per visit. This helps support overall program compliance by showing the details of visit verification activity. As you know for any program the goal is typically to have as many auto-verified visits as possible to reduce manual editing. This helps improve the quality of visit capture and minimize the amount of work a provider agency must do.

Auto Verification Summary

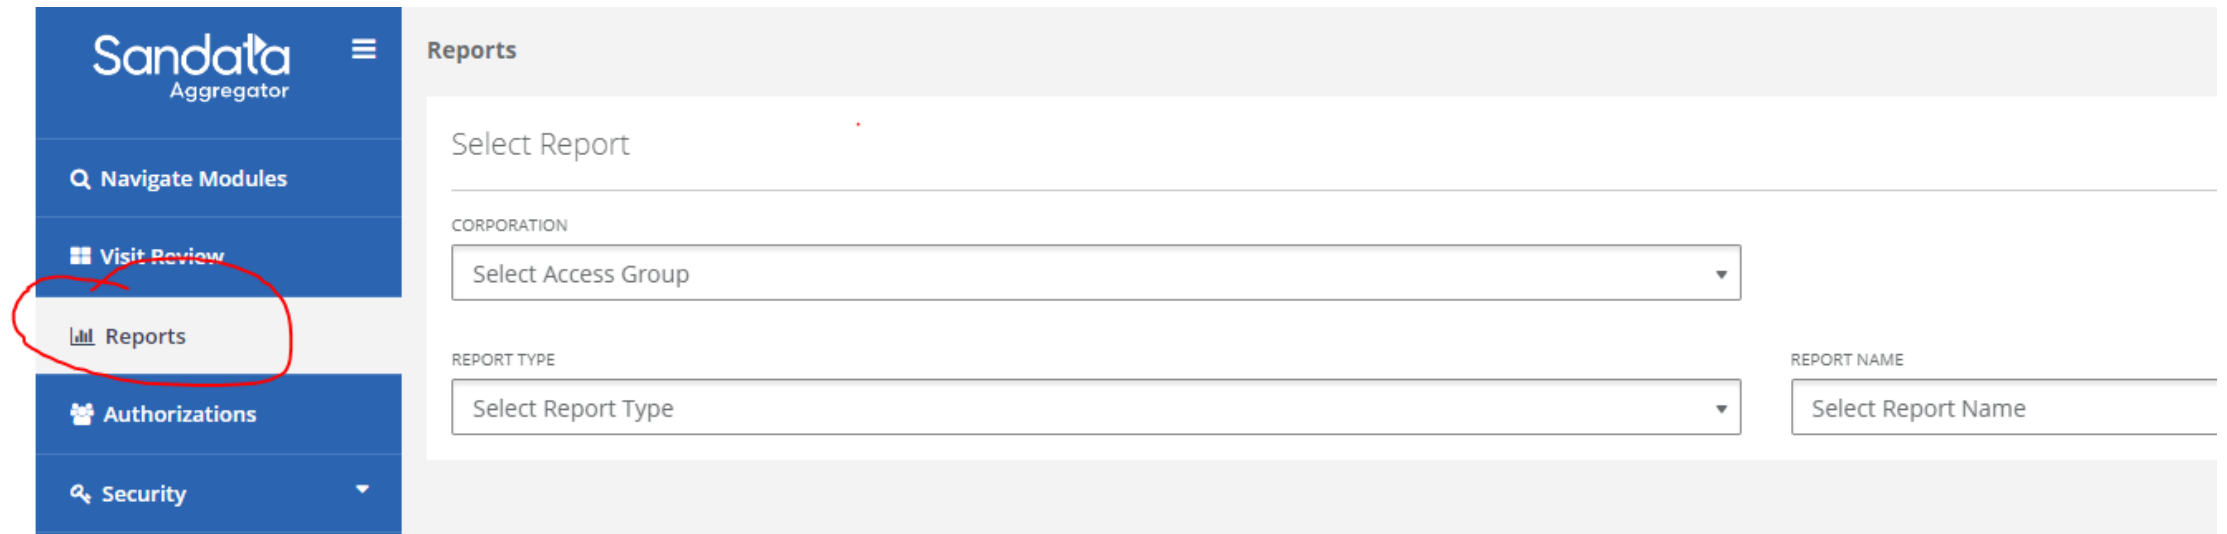

This report displays auto verification statistics for each provider agency. The report allows the user to compare the number of automatically verified visits versus manually confirmed visits across their agencies. The report will also display all visits pending verification as well as scheduled for which a visit was not started. This report displays cross agency visit verification trends which is also intended to help overall program compliance.

Delaware Aggregator Auto Verification Reports

Accessing Auto Verification Details and Auto Verification Summary Aggregator Reports

Log into the Aggregator. Navigate to the Reports section.

A screenshot of the Sandata Aggregator web application. The left sidebar is blue and contains the Sandata Aggregator logo, a search bar, and several menu items: 'Navigate Modules', 'Visit Review', 'Reports' (highlighted with a red circle), 'Authorizations', and 'Security'. The main content area is white and titled 'Reports'. It contains a 'Select Report' section with a search bar, a 'CORPORATION' section with a 'Select Access Group' dropdown, a 'REPORT TYPE' section with a 'Select Report Type' dropdown, and a 'REPORT NAME' section with a 'Select Report Name' dropdown.

Delaware Aggregator Auto Verification Reports

Here is a sample Auto Verification Summary report:

Report Parameters
Account: DEV Agency (10010)
For: 7/1/2023 - 7/31/2023 11:59:59 PM

Auto Verification Summary

			VERIFIED VISITS				NON VERIFIED VISITS				WITH MANUAL UPDATES						ALL VISITS			
ACCOUNT	ACCOUNT NAME	PROVIDER ID	AUTO	%	MANUAL	%	IN-COMPLETE	%	OMIT	%	MANUAL CALLS	%	MANUAL EDITS	%	ADJ. VISITS	%	VERIFIED VISITS	%	NON VERIFIED VISITS	%
10010	DEV Agency	0010010	0	0.0	1	100.0	18	94.7	0	0.0	1	100	1	100	0	0	1	5.3	18	94.7
Grand Totals:			0		1		18		0		1		1		0		1		18	

^^The values in "WITH MANUAL UPDATES" section can overlap. This means that a visit can belong to more than one group. The percentage is based on all visits that were manually verified.

Trouble Shooting-Visit and Claim Mismatches

Step 1: Log into the Aggregator

- Check visit status.

The screenshot shows a search interface for an aggregator. At the top, there are five input fields: AGENCY (a dropdown menu, circled in red), CLIENT (text input), MEDICAID ID # (text input), EMPLOYEE (text input), and EMPLOYEE SSN 000-00-0000 (text input). Below these are three filter sections: DATE RANGE * MM/DD/YYYY (01/01/2025 to 05/20/2025), VISIT STATUS (All), and FILTER VISITS BY (All Visits). A 'Show Advanced Filter Options' link is on the right. At the bottom left are 'SEARCH' and 'CLEAR' buttons. A large light gray box at the bottom contains the text 'No Data Found!', which is circled in red.

- If you get a No Data Found message, it may be a misalignment between your Alt EVV vendor and Sandata/HHAeXchange. Confirm vendor is aligned to the right STX number (STX number is included with Agency name).

Trouble Shooting-Visit and Claim Mismatches

Step 1: Log into the Sandata aggregator

- Check visit status.
 - Incomplete means there is an issue with the data. Red dots identify missing information (update in Alt EVV system and resubmit)

Service	Visit Date	Scheduled Time In	Scheduled Time Out	Scheduled Hrs	Call In	Call Out	Call Hours	Adjusted In	Adjusted Out	Adjusted Hours	Bill Hours	Visit Status	Do Not Bill
WDE Attendant Care - Self-Directed	04/05/2025	11:30 AM	10:00 PM	10:30	11:00 AM	●		11:00 AM				Incomplete	<input type="checkbox"/>
WDE Attendant Care - Self-Directed	04/04/2025	07:00 AM	03:00 PM	08:00	06:55 AM	●		06:55 AM				Incomplete	<input type="checkbox"/>

- Verified status means there are no issues with the visit data.
- Processed status means a claim has matched against the visit data

Trouble Shooting Visit and Claim Mismatches

Step 2: Compare the visit data to the claim and review for accuracy.

- Verify visit data was present in Sandata prior to claim submission.
- Verify each day is on single claim line (no span billing).
- Verify units match (see rounding rules).

Rounding Rules

- Rule 1 (15-minute unit of service):
 - 0s - 479s (<8 min)= 0 Units
 - 480s - 1379s (≥ 8 min <23 min)= 1 Units
 - 1380s - 2279s (≥ 23 min <38 min) = 2 Units
 - 2280s – 3179s (≥ 38 min <53 min) = 3 Units
 - 4080s – 4979s (≥ 68 min <83 min) = 4 Units

Trouble Shooting Visit and Claim Mismatches

Rounding Rules (continued)

- Rule 2 (FFS only--hourly):
 - 0s - 479s (<8 min)= 0 Units
 - 480s - 1379s ($\geq 8\text{min}$ <23min)= .25 Unit
 - 1380s - 2279 ($\geq 23\text{min}$ <38min) = .50 Unit
 - 2280s - 3179 ($\geq 38\text{min}$ <53min) = .75 Unit
 - 3180s – 4079($\geq 53\text{min}$ < 68min) = 1 Unit
- Rule 3 (MCOs—hourly)
 - <53 minutes – 0 unit
 - >53 minutes and <113 minutes = 1 unit
 - >113 minutes and <173 minutes = 2 units
 - >173 minutes and <233 minutes = 3 units

Rounding Rules

- Be sure your Alternate EVV vendor applies NO rounding rules to data
 - Some alternate EVV vendor systems are configured to apply rounding rules to clock in and clock out times. **Providers should confirm their vendor applies no rounding rules to data.**

Reminders

- To promote matching accuracy, providers should **submit visit data to Sandata/HHAeXchange as quickly as possible after the visit.**
- TU modifier should always be placed in the last position
- CG modifier should always be in the first position.
 - Use CG modifier on claims for visits that do not require EVV (e.g., EVV services that are provided by live-in caregivers)
- Claims for services subject to EVV must still go through all “typical” claim edits in addition to the EVV edits.
 - Just because a claim passes EVV edits does not guarantee payment.

Reminders

- Change order to require use of full SSN is in progress.
No ETA.
- **DMMA has targeted November 1, 2025, for implementation of the hard edit**
 - This means that claims with date of service 11/1/2025 or later that have no corresponding visit will be denied.

Reminders—Inactivate Old MCDID/STX

- To inactivate a STX/MCDID, email decustomercare@sandata.com
- Include “Delaware” and the Sandata/HHAeXchange assigned account (STX) number in the subject line.
- Ask that the account associated with the terminated MCDID be inactivated.

The screenshot shows a search interface with a list of search results and two buttons at the bottom. The search results are displayed in a table-like format with a blue header row. A mouse cursor is pointing at the first result. Below the search results, there are two buttons: 'SEARCH' and 'CLEAR'.
